Subject: RE: California DWR meeting with Corps and EPA on April 8 in SF

Col. Farrell—Thanks for your encouraging call yesterday. Since you said you'd be out this morning, I just tried to phone you, but got your full voice mail box. I'll be in the office until at least 4:45 today if you have time to call. I'll be at an off-site meeting most of Monday and in transit/in Sacramento most of Tuesday, but should have time to talk, especially on Tuesday, and will pick up calls when I can. It would be good to touch base before the Wednesday meeting. Thanks, Jane

Jane Diamond

Col. Farrell—I wanted to make sure you are aware of a meeting planned for April 8, 9:00-10:00, at South Pacific Division among Brigadier General Mark Toy, Mark Cowin of CDWR, Karla Nemeth of the Governor's Office and EPA Regional Administrator Jared Blumenfeld (along with me and Kathleen Johnson who leads our NEPA program) to discuss the Bay Delta Conservation Plan. Jared suggested this meeting to Karla after pressing the State on the critical need to actively engage the Corps, given the substantial role you play in permitting this evolving and extremely high priority project. Karla said Mark Cowin has been in recent discussions with you. EPA is very interested in working with the Corps on the 404 aspects of the project, and I know our managers and staff have been talking. I'd be interested in discussing with you how our organizations can work most effectively together and with the State. My direct line, which also rings to my mobile phone, is below. Thanks, Jane
